

Testimonial

Date: 15 August 2024

To whom it may concern,

I am delighted to write this testimonial for Jing O, who recently completed an internship at Micron Singapore from May to August 2024. Jing demonstrated exceptional skills and dedication throughout the internship, making significant contributions to our projects.

During the internship, Jing worked on the SSD Test Automation and Smart Monitoring System using Python. From the start, Jing's ability to quickly grasp complex concepts and apply them effectively was evident. I would also like to commend Jing for their exceptional programming skills.

Jing's attention to detail and problem-solving abilities were particularly impressive. Jing also collaborated closely with team members, asking the right questions and always willing to assist and share knowledge.

One of Jing's notable achievements was the creation of an SSD monitoring system capable of predicting SSD defects using four machine learning models. This tool has become invaluable for our team, providing real-time insights and facilitating better decision-making.

Jing's positive attitude, strong work ethic, and excellent communication skills made them a pleasure to work with. He consistently met deadlines and exceeded expectations, demonstrating a high level of professionalism and commitment to the work.

I have no doubt that Jing will continue to excel in their future endeavors. I highly recommend Jing to any team seeking exceptional talent.

Yours faithfully,

Jayden Pui

Senior Manager, Micron Singapore
