

Subject: Testimonial for Jing O – SAP Full Stack Developer Intern

To whom it may concern,

I am writing to highly recommend Jing O following his successful internship as an SAP Full Stack Developer with our Personalized Recommendations team. Jing was a standout intern, consistently impressing us with his software engineering capabilities and his natural aptitude for teamwork.

During his internship, Jing played a key role in several development initiatives. He collaborated effectively on the integration of monitoring tools such as Grafana and Dynatrace into our production environment, a project that significantly improved our team's ability to monitor application health and performance. Additionally, Jing was involved in conducting performance testing using Locust, helping us to assess and ensure the scalability of our systems. Beyond this, Jing proactively sought out opportunities to refine our existing codebase, demonstrating a keen eye for improvement and a quick-thinking approach to problem-solving.

Jing's enthusiasm for learning and his dedication to developing his skills as a full stack developer were evident in all his work. He is a committed team player, and I have no doubt he will excel in his future endeavours.

Best Regards,
Sai Mun Lee
